19th Century Lustreware Michael Gibson 1999 The author is one of the foremost authorities on lustreware and has incorporated all the latest research into his text. In some cases this has necessitated a rethinking of previously held theories and this adds greatly to the book's interest for collectors. The reader is taken from lustreware's beginnings in 1805 through its heyday in the first half of that century, with later lustrewares also touched on. The techniques of lustring are described in some detail and there is a comprehensive coverage of the companies and personalities involved in its manufacture - everything, in fact, that the collector needs to know.

Clothing Culture, 1350-1650 Catherine Richardson 2016-09 Addressing the subject of clothing in relation to such fundamental issues as national identity, social distinction, gender, the body, religion and politics, Clothing Culture, 1350-1650 provides a springboard into one of the most fascinating yet least understood aspects of social and cultural history. Nowhere in medieval and early modern European society was its hierarchical and social divisions more obviously reflected than in the sphere of clothing. Indeed, one of the few constant themes of writers, chroniclers, diarists and commentators from Chaucer to Pepys was the subject of fashion and clothes. Whether it was lauding the magnificence of court, warning against the vanity of fashion, describing the latest modes, or decrying the habit of the lower orders to ape the dress of their social superiors, people throughout history have been fascinated by the symbolism, power and messages that clothes can project. Yet despite this contemporary interest, clothing as a subject of historical enquiry has been a largely neglected field of academic study. Whilst it has been discussed in relation to various disciplines, it has not in many cases found a place as a central topic of analysis in its own right. The essays presented in this volume form part of a growing recent trend to put fashion and clothing back into the centre ground of historical research. From Russia to Rome, Ireland to France, this volume contains a wealth of examples of the numerous ways clothing was shaped by, and helped to shape, medieval and early modern European society. Furthermore, it demonstrates how the study of clothing can illuminate other facets of life and why it deserves to be treated as a central, rather than peripheral, facet of European history.

Honda K-Series Engine Swaps Aaron Bonk 2014-07-15 The Honda K-Series engine was introduced in 2001, replacing the B-Series as the engine of choice for Honda enthusiasts. These new K-Series engines are the most powerful stock Honda/Acura engines you can get. They featured new technology such as a roller rocker valvetrain, better flowing heads, and advanced variable cam timing technology that made these engines suddenly the thing to have. And that's where the engine swappers come in. In Honda K-Series Engine Swaps, author Aaron Bonk guides you through all the details, facts, and figures you will need to complete a successful K-Series swap into your older chassis. All the different engine variants are covered, as well as interchangeability, compatibility, which accessories work, wiring and controls operation, drivetrain considerations, and more. While you can still modify your existing B-Series, dollar for dollar, you can't make more power than you can with a Honda K-Series engine. If you have an older chassis and are looking for a serious injection of power and technology, swapping a K-Series engine is a great option. Honda K-Series Engine Swaps will tell you everything you need to know.

Mini Giles Chapman 2019-04-30 Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.

[BMC Leyland Australia Vehicle Reference](#) Peter Davis 2020-05-10 Some 40 years ago, Leyland Australia ceased manufacturing passenger vehicles in Australia. These days, many of the cars produced by Nuffield (Australia), the Austin Motor Company (Australia) the British Motor Corporation (Australia), British Leyland Motor Corporation of Australia and Leyland Australia from 1950 to 1982 remain popular and have become classics. Of particular interest to present day owners, registration authorities, car club officials, as well as motoring and engineering historians, is a record of what BMC/Leyland passenger vehicles were produced and the means by which they were identified. Our aim in this book is to provide an authoritative reference to this end.
