Instructor's Manual for California's Bus Driver's Training Course California. Department of Education 1990

This instructor's manual was designed to help graduates of the California Bus Driver Instructor Course provide effective instruction to school bus driver trainees. It contains enough material for 20-30 hours of classroom training. The information is organized in 12 instructional units that cover the following topics: introduction to the course; driver's license and special certificate requirements; bus operation, use, laws, and regulations; vehicle components; general defensive driving techniques; specialized defensive driving techniques; passenger loading and unloading; emergency procedures; passenger management; activity trips; the special needs passenger; and public and community relations. Each unit includes an outline of the lesson plans in it, notes to the instructor, content information, handouts, and pretests and unit test. A final unit of the guide provides additional information for the instructor on teaching the course, such as materials needed to conduct classes, classroom arrangement, lesson planning and teaching techniques, and tests and answer keys. Paramedic: Pharmacology Applications American Academy of Orthopaedic Surgeons (AAOS), 2015-08-12 Pharmacologic intervention is a cornerstone of paramedic treatment. Paramedic: Pharmacology Applications covers the relevant issues of pharmacology as they relate to the field practice of the paramedic. The text gives students a comprehensive understanding of the indications, contraindications, and side effects of medications, as well as insight into the pathophysiology and etiology of conditions requiring rapid pharmacologic intervention. In addition, progressive case studies are found in each chapter. The cases follow patients from dispatch through delivery to the emergency department and cover every aspect of assessment and treatment. Each case study includes eight critical thinking questions. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Emergency Response Guidebook U.S. Department of Transportation 2013-06-03 Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.
