Seven Voyages Laurence Bergreen 2021-01-19 From New York Times bestselling author Laurence Bergreen and author Sara Fray comes this immaculately researched history for young readers detailing the life of Zheng He, his complex and enduring friendship with his emperor, and the epic Seven Voyages he led that would establish China as a global power. 1405. The central coast of China. At nearly seven feet tall, Admiral Zheng He looked out at the sea before him. For the next three decades, the oceans would be his home, as he would command over 1,500 ships and thousands of sailors in seven journeys that would predate the heart of the European Age of Exploration. Over his seven epic journeys, Zheng He explored the Northern Pacific and Indian Oceans, traveling as far as the east coast of Africa, expanding Chinese power globally, warring with pirates, and capturing enemies along the way in the name of his emperor, Zhu Di. But this giant figure was not always at the helm of a ship.

Chinese Whiskers Pallavi Aiyar 2012-12-11 Chinese Whiskers by Pallavi Aiyar is a charming fable set against the landscape of contemporary Beijing, seen through the eyes of two cats. Soyabean is a middle class cat looked after by a grandmother who embodies traditional Chinese morality. Tofu is born to a stray cat mother in a backyard dustbin. They are brought together when they are adopted by foreigners, who live in a traditional style courtyard house in Beijing's traditional hutong neighborhoods. Then Soyabean is offered a job as a model for a new brand of cat food while at the same time a mysterious virus is sickening people across the city. Cats are blamed for it and are being rounded up, and Soyabean and Tofu's idyllic lives as pampered pets come to an abrupt end. Interweaving real episodes in recent Chinese history such as the Olympic Games, the SARS virus, and tainted pet-food scandals with a richly imagined world, this heartwarming story of cats and humans does what W. Bruce Cameron's A Dog's Purpose did for canines. It will make you laugh and tear up, while showing the battles fought between the corruption of modern living and the ideals of traditional life.

America's Coming War with China Ted Galen Carpenter 2015-03-31 One issue could lead to a disastrous war between the United States and China: Taiwan.

A growing number of Taiwanese want independence for their island and regard mainland China as an alien nation. Mainland Chinese consider Taiwan a province that was stolen from China more than a century ago, and their patience about getting it back is wearing thin. Washington officially endorses a "one China" policy but also sells arms to Taiwan and maintains an implicit pledge to defend it from attack. That vague, muddled policy invites miscalculation by Taiwan or China or both. The three parties are on a collision course, and unless something dramatic changes, an armed conflict is virtually inevitable within a decade. Although there is still time to avert a calamity, time is running out. In this book, Carpenter tells the reader what the U.S. must do quickly to avoid being dragged into war.

Literature the People Love Krista Van Fleit Hang 2013-05-07 Examining the production of 'people's literature' in China, this study provides a new interpretive framework with which to understand socialist literature and presents a sympathetic understanding of culture from a period in China's history in which people's lives were greatly and obviously affected by political events.

Modern China Cary Krosinsky 2020-05-23 Calling for more cooperation between China and the west, this new book by noted author and educator Cary Krosinsky provides readers with an on-the-ground perspective of what’s really happening in China today on the back of its recent economic rise, its desire and need to solve environmental challenges and the new positive dynamic created by its need for foreign capital. In doing so, Krosinsky and his colleagues from the Sustainable Finance Institute and Brown University highlight how China has recaptured its role as a leader in innovation, arguing that current approaches to the relationship hinder global progress on issues such as climate change, inequality, air pollution, food integrity and water security and pushes back on confrontational approaches and attempts to clarify misperceptions about contemporary China. China’s recent rise includes becoming a global leader on green policy and green finance, as it is increasingly leading the way towards modernization through innovation strategies focused on infrastructure, education, healthcare and aspects of clean energy technology, leading to opportunities across private equity, venture capital and green bonds. This creates an exciting opportunity for positive change, with environmental challenges becoming more salient to its own population, adding pressure on the government to provide solutions. China changes faster than any country in the world, creating an opportunity for meaningful, ongoing, positive transitions. Modern China is a call for more cooperation, and makes a clear, cogent case for collaboration in the face of current confrontational approaches. At the same time, dire environmental and social circumstances require an all-hands-on-deck approach. This book provides specific examples of what’s working and what’s needed to compete and thrive in this new paradigm through trusted relationships placed front and center for the future of economies and the betterment of global society.

Nixon and Mao Margaret MacMillan 2007-02-13 Margaret MacMillan, praised as “a superb writer who can bring history to life” (The Philadelphia Inquirer), brings her extraordinary gifts to one of the most important subjects today—the relationship between the United States and China—and one of the most significant moments in modern history. In February 1972, Richard Nixon, the first American president ever to visit China, and Mao Tse-tung, the enigmatic Communist dictator, met for an hour in Beijing. Their meeting changed the course of history and ultimately laid the groundwork for the complex relationship between China and the United States that we see today. That monumental meeting in 1972—during what Nixon called “the week that changed the world”—could have been brought about only by powerful leaders: Nixon himself, a great strategist and a flawed human being, and Mao, willful and ruthless. They were assisted by two brilliant and complex statesmen, Henry Kissinger and Chou En-lai. Surrounding them were fascinating people with unusual roles to play, including the enormously disciplined and unhappy Pat Nixon and a small-time Shanghai actress turned monstrous empress, Jiang Qing. And behind all of them lay the complex history of two countries, two great and equally confident civilizations: China, ancient and contemptuous yet fearful of barbarians beyond the Middle Kingdom, and the United States, forward-looking and confident, seeing itself as the beacon for the world. Nixon thought China could help him get out of Vietnam. Mao needed American technology and expertise to repair the damage of the Cultural Revolution. Both men wanted an ally against an aggressive Soviet Union. Did they get what they wanted? Did Mao betray his own revolutionary ideals? How did the people of China react to this apparent change in attitude toward the imperialist Americans? Did Nixon make a mistake in coming to China as a supplicant? And what has been the impact of the visit on the United States ever since? Weaving together fascinating anecdotes and insights, an understanding of Chinese and American history, and the momentous events of an extraordinary time, this brilliantly written book looks at one of the transformative moments of the twentieth century and casts new light on a key relationship for the world of the twenty-first century.

China Mountain Zhang Maureen F. McHugh 1997-04-15 Winner of the James Tiptree, Jr. Memorial Award, the Lambda Literary Award, the Locus Award for Best First Novel, and a Hugo and Nebula Award nominee. With this groundbreaking novel, Maureen F. McHugh established herself as one of the

decade's best science fiction writers. In its pages, we enter a postrevolution America, moving from the hyperurbanized eastern seaboard to the Arctic bleakness of Baffin Island; from the new Imperial City to an agricultural commune on Mars. The overlapping lives of cyberkite fliers, lonely colonists, illicit neural-pressball players, and organic engineers blend into a powerful, taut story of a young man's journey of discovery. This is a macroscopic world of microscopic intensity, one of the most brilliant visions of modern SF. Snow Falling in Spring Moying Li 2010-03-06 Most people cannot remember when their childhood ended. I, on the other hand, have a crystal-clear memory of that moment. It happened at night in the summer of 1966, when my elementary school headmaster hanged himself. In 1966 Moying, a student at a prestigious language school in Beijing, seems destined for a promising future. Everything changes when student Red Guards begin to orchestrate brutal assaults, violent public humiliations, and forced confessions. After watching her teachers and headmasters beaten in public, Moying flees school for the safety of home, only to witness her beloved grandmother denounced, her home ransacked, her father's precious books flung onto the back of a truck, and Baba himself taken away. From labor camp, Baba entrusts a friend to deliver a reading list of banned books to Moying so that she can continue to learn. Now, with so much of her life at risk, she finds sanctuary in the world of imagination and learning. This inspiring memoir follows Moying Li from age twelve to twenty-two, illuminating a complex, dark time in China's history as it tells the compelling story of one girl's difficult but determined coming-of-age during the Cultural Revolution. Rouge Street Shuang Xuetao 2022-04-19 NAMED A MOST ANTICIPATED BOOK OF 2022 BY LITERARY HUB, BUSTLE, BOOK CULTURE, AND THE MILLIONS Introduced by Madeleine Thien, author of the Booker finalist novel Do Not Say We Have Nothing From one of the most highly celebrated young Chinese writers, three dazzling novellas of Northeast China, mixing realism, mysticism, and noir. An inventor dreams of escaping his drab surroundings in a flying machine. A criminal, trapped beneath a frozen lake, fights a giant fish. A strange girl pledges to ignite a field of sorghum stalks. Rouge Street presents three novellas by Shuang Xuetao, the lauded young Chinese writer whose frank, fantastical short fiction has already inspired comparisons to Ernest Hemingway and Haruki Murakami. Located in China’s frigid Northeast, Shenyang, the author’s birthplace, boasts an illustrious past—legend holds that the emperor’s makeup was manufactured here. But while the city enjoyed renewed importance as an industrial hub under Mao Zedong, China’s subsequent transition from communism to a market economy led to an array of social ills—unemployment, poverty, alcoholism, domestic violence, divorce, suicide—that gritty Shenyang epitomizes. Orbiting the toughest neighborhood of a postindustrial city whose vast, inhospitable landscape makes every aspect of life a struggle, these many-voiced missives are united by Shuang Xuetao’s singular style—one that balances hardscrabble naturalism with the transcendent and faces the bleak environs with winning humor. Rouge Street illuminates not only the hidden pains of those left behind in an extraordinary economic boom but also the inspirations and grace they, nevertheless, manage to discover.

Blockchain Chicken Farm Xiaowei Wang 2020-10-13 A New York Times Book Review Editors' Choice "A brilliant and empathetic guide to the far corners of global capitalism." --Jenny Odell, author of How to Do Nothing From FSGO x Logic: stories about rural China, food, and tech that reveal new truths about the globalized world In Blockchain Chicken Farm, the technologist and writer Xiaowei Wang explores the political and social entanglements of technology in

rural China. Their discoveries force them to challenge the standard idea that rural culture and people are backward, conservative, and intolerant. Instead, they find that rural China has not only adapted to rapid globalization but has actually innovated the technology we all use today. From pork farmers using AI to produce the perfect pig, to disruptive luxury counterfeits and the political intersections of e-commerce villages, Wang unravels the ties between globalization, technology, agriculture, and commerce in unprecedented fashion. Accompanied by humorous “Sinofuturist” recipes that frame meals as they transform under new technology, Blockchain Chicken Farm is an original and probing look into innovation, connectivity, and collaboration in the digitized rural world. FSG Originals × Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech’s reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry’s many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

Surveillance State Josh Chin 2022-09-06 Where is the line between digital utopia and digital police state? Surveillance State tells the gripping, startling, and detailed story of how China’s Communist Party is building a new kind of political control: shaping the will of the people through the sophisticated—and often brutal—harnessing of data. It is a story born in Silicon Valley and America’s “War on Terror,” and now playing out in alarming ways on China’s remote Central Asian frontier. As a minority separatist movement strains against Party control, China’s leaders have built a dystopian police state that keeps millions under the constant gaze of security forces armed with AI. But across the country in the city of Hangzhou, the government is weaving a digital utopia, where technology helps optimize everything from traffic patterns to food safety to emergency response. Award-winning journalists Josh Chin and Liza Lin take readers on a journey through the new world China is building within its borders, and beyond. Telling harrowing stories of the people and families affected by the Party’s ambitions, Surveillance State reveals a future that is already underway—a new society engineered around the power of digital surveillance.

The Story of China Michael Wood 2020-11-17 A single volume history of China, offering a look into the past of the global superpower and its significance today. Michael Wood has travelled the length and breadth of China, the world’s oldest civilization and longest lasting state, to tell a thrilling story of intense drama, fabulous creativity, and deep humanity that stretches back thousands of years. After a century and a half of foreign invasion, civil war, and revolution, China has once again returned to center stage as a global superpower and the world’s second largest economy. But how did it become so dominant? Wood argues that in order to comprehend the great significance of China today, we must begin with its history. The Story of China takes a fresh look at the Middle Kingdom in the light of the recent massive changes inside the country. Taking into account exciting new archeological discoveries, the book begins with China’s prehistory—the early dynasties, the origins of the Chinese state, and the roots of Chinese culture in the age of Confucius. Wood looks at particular periods and themes that are now being reevaluated by historians, such as the renaissance of the Song with its brilliant scientific discoveries. He paints a vibrant picture of the Qing Empire in the 18th century, just before the European impact, a time when China’s rich and diverse culture was at its height. Then, Wood explores the encounter with the West, the Opium Wars, the clashes with the British, and the extraordinarily rich

debates in the late 19th century that pushed China along the path to modernity. Finally, he provides a clear up-to-date account of post-1949 China, including revelations about the 1989 crisis based on newly leaked inside documents, and fresh insights into the new order of President Xi Jinping. All woven together with landscape history and the author’s own travel journals, The Story of China is the indispensable book about the most intriguing and powerful country on the world stage today.

Today Hong Kong, Tomorrow the World Mark L. Clifford 2022-02-01 A gripping history of China’s deteriorating relationship with Hong Kong, and its implications for the rest of the world. For 150 years as a British colony, Hong Kong was a beacon of prosperity where people, money, and technology flowed freely, and residents enjoyed many civil liberties. In preparation for handing the territory over to China in 1997, Deng Xiaoping promised that it would remain highly autonomous for fifty years. An international treaty established a Special Administrative Region (SAR) with a far freer political system than that of Communist China—one with its own currency and government administration, a common-law legal system, and freedoms of press, speech, and religion. But as the halfway mark of the SAR’s lifespan approaches in 2022, it is clear that China has not kept its word. Universal suffrage and free elections have not been instituted, harassment and brutality have become normalized, and activists are being jailed en masse. To make matters worse, a national security law that further crimps Hong Kong’s freedoms has recently been decreed in Beijing. This tragic backslide has dire worldwide implications—as China continues to expand its global influence, Hong Kong serves as a chilling preview of how dissenters could be treated in regions that fall under the emerging superpower’s control. Today Hong Kong, Tomorrow the World tells the complete story of how a city once famed for protests so peaceful that toddlers joined grandparents in millions-strong rallies became a place where police have fired more than 10,000 rounds of tear gas, rubber bullets and even live ammunition at their neighbors, while pro-government hooligans attack demonstrators in the streets. A Hong Kong resident from 1992 to 2021, author Mark L. Clifford has witnessed this transformation firsthand. As a celebrated publisher and journalist, he has unrivaled access to the full range of the city’s society, from student protestors and political prisoners to aristocrats and senior government officials. A powerful and dramatic mix of history and on-the-ground reporting, this book is the definitive account of one of the most important geopolitical standoffs of our time.
