Writing and Publishing a Scientific Research

Paper Subhash Chandra Parija 2017-07-28 This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, "must-know" content on how to write high-quality articles. The book also addresses other,

rarely discussed areas of scientific writing including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing work in a scientific journal is the lack of information on or experience with scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published.

The Immortal Life of Henrietta Lacks

Rebecca Skloot 2010-02-02 #1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet

Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences. *Essays in Ethics and Religion* James Seth 1926

Trends in business ethics Cees van Dam 2012-12-06 In August 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee 'Of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting, and has been published as volume 1 of this series. A collection of fourteen papers has been published as the second volume under the title Trends in financial decision making, while this volume, consisting of twelve papers (and an introduction) explores the theme Trends in business ethics. The introduction by Stanley L. Jakiwas written for the symposium. It suggests why the papers of Pjotr Hesseling, Antoine Kreykamp, and Richard H. Viola, which were not presented at Nijenrode, are introduced here. *Canadian Issues in Environmental Ethics* Wesley Cragg 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business, labour and First Nations representatives? What is the best path through

the tangle of ethical issues surrounding the collapse of the east coast fishery? What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice? These are the sorts of issues in applied ethics that are tackled in this collection of essays, the vast majority of which have been written especially for this volume. It is the first Canadian collection of its kind. The book is divided into sections detailing with such topics as the environment and the economy; ethical issues relating to non-human animals; issues of gender; and issues relating to native peoples. Most of the authors are philosophers, though specialists in geography, geology, and the social sciences are also among the contributors. Frequent reference is made to theoretical ethical concerns, but the focus throughout is on applied ethics, and a variety of case studies are included. (Examples include essays on animal rights and the case of native hunters; surface mining in Northern Ontario, the Quebec arctic; and fishing communities in the Maritimes.) Comparisons are frequently drawn to policies and ethical questions arising in other countries—most prominently the United States.

Smallpox, Syphilis and Salvation Sheryl Persson 2010-04 Since ancient times the search for cures for the great scourges that have afflicted humankind has been an ongoing quest, but it is only within the last 200 years that major breakthroughs have occurred and the development of modern medicine has accelerated. The stories behind these miraculous cures are those of intense rivalries and jealousies, bitter public humiliation, unswerving dedication, subterfuge, and great personal struggles. Often these medical advances have truly changed the world. When Edward Jenner developed the concept of vaccination, and with it the cure for smallpox, he found a way to defeat a disease that had affected half a billion people — more than all those affected by wars and other epidemics combined. And while the Black Death still lingers in pockets around the world, it no longer threatens to destroy entire civilisations as it once did. **SMALLPOX, SYPHILIS AND SALVATION** uncovers the compelling stories of the men and women, innovations and accidents that have led to diseases from polio to syphilis, diphtheria to diabetes, tetanus to leukaemia no

longer being the death sentences they once were. It also sounds a note of warning — for some of these diseases are fighting back. It is estimated that tuberculosis now claims one life every fifteen seconds, while new 'superbugs' are resistant to penicillin and other antibiotics. Diseases may once again threaten to crush the world's population, either in the form of biological warfare or simply because they want to survive as much as we do ...

Ethical and Policy Issues in International Research: Commissioned papers and staff analysis

United States. National Bioethics Advisory Commission 2001
Our Stories John Martin Fischer 2009-05-06
In this collection of essays on the metaphysical issues pertaining to death, the meaning of life, and freedom of the will, John Martin Fischer argues (against the Epicureans) that death can be a bad thing for the individual who dies. He defends the claim that something can be a bad thing--a misfortune--for an individual, even if he never experiences it as bad (and even if he does not any longer exist). Fischer also defends the commonsense asymmetry in our attitudes toward death and prenatal nonexistence: we are indifferent to the time before we are born, but we regret that we do not live longer. Further, Fischer argues (against the immortality curmudgeons, such as Heidegger and Bernard Williams), that immortal life could be desirable, and shows how the defense of the (possible) badness of death and the (possible) goodness of immortality exhibit a similar structure; on Fischer's view, the badness of death and the goodness of life can be represented on spectra that display certain continuities. Building on Fischer's previous book, *My Way* a major aim of this volume is to show important connections

between issues relating to life and death and issues relating to free will. More specifically, Fischer argues that we endow our lives with a certain distinctive kind of meaning--an irreducible narrative dimension of value--by exhibiting free will. Thus, in acting freely, we transform our lives so that our stories matter.
The Moral Dimension of Marketing D. Kirk Davidson 2002
The Moral Dimension of Marketing is a collection of essays that explores the tension between economics and ethics that all marketing executives face on a daily basis. The essays are all based on real-life situations that students and professionals alike will recognize, and they are grouped under familiar marketing headings: targeting, products, pricing, promotion and advertising, distribution, privacy, and inappropriate marketing. Each essay concludes with two or three questions that focus the reader's attention to the critical issues raised in that essay. The book is designed to be used in virtually any marketing course as a supplemental reading to stimulate thoughtful analysis of moral issues; it can also be used as a stand-alone text in a marketing ethics or a business ethics course. It should be provocative reading for marketing professionals as well.
Essays on Ethics, Social Behaviour, and Scientific Explanation J.C. Harsanyi 1976-12-31
When John Harsanyi came to Stanford University as a candidate for the Ph.D., I asked him why he was bothering, since it was most unlikely that he had anything to learn from us. He was already a known scholar; in addition to some papers in economics, the first two papers in this volume had already been published and had dazzled me by their originality and their combination of philosophical insight and technical competence. However, I am very glad I did not discourage him; whether he learned anything worthwhile I don't know, but we all learned much from him on the foundations of the theory of games and specifically on the outcome of bargaining. The central focus of Harsanyi's work has continued to be in the theory of games, but especially on the foundations and conceptual problems. The theory of games, properly understood, is a very broad approach to social interaction based on individually rational behavior, and it connects closely with fundamental methodological and substantive

issues in social science and in ethics. An indication of the range of Harsanyi's interest in game theory can be found in the first paper of Part B -though in fact his own contributions are much broader-and in the second paper the applications to the methodology of social science. The remaining papers in that section show more specifically the richness of game theory in specific applications.

How to Play Video Games Nina Huntemann
2019-03-26 Forty original contributions on games and gaming culture What does Pokémon Go tell us about globalization? What does Tetris teach us about rules? Is feminism boosted or bashed by Kim Kardashian: Hollywood? How does BioShock Infinite help us navigate world-building? From arcades to Atari, and phone apps to virtual reality headsets, video games have been at the epicenter of our ever-evolving technological reality. Unlike other media technologies, video games demand engagement like no other, which begs the question—what is the role that video games play in our lives, from our homes, to our phones, and on global culture writ large? How to Play Video Games brings together forty original essays from today's leading scholars on video game culture, writing about the games they know best and what they mean in broader social and cultural contexts.

Read about avatars in Grand Theft Auto V, or music in The Legend of Zelda: Ocarina of Time. See how Age of Empires taught a generation about postcolonialism, and how Borderlands exposes the seedy underbelly of capitalism.

These essays suggest that understanding video games in a critical context provides a new way to engage in contemporary culture. They are a must read for fans and students of the medium.

Target Centred Virtue Ethics Christine Swanton
2021-04-15 Christine Swanton presents a new target centred virtue ethics, which is opposed to orthodox virtue ethics in two major ways. She rejects the 'natural goodness' metaphysics of neo-Aristotelian virtue ethics in favour of a 'hermeneutic ontology' of ethics, and she offers a new target centred framework for assessing rightness of acts.
