Russia and the USSR 1905-1941 Terry Fiehn 1997 Stretch and challenge your students with SHP's longest-lived and best-selling series for GCSE History. This is an SHP Official Text which means it has been created by the

Schools History Project for use with the GCSE specifications. This is part of SHP's comprehensive and authoritative range of books for GCSE History. Click here to find out more about the Schools History Project and their award winning publications. *Russia and the USSR 1905-1941* This title is a comprehensive and authoritative depth study for use with all GCSE level specifications. It thoroughly covers the content requirements of the OCR, Edexcel, AQA and CIE specifications using an enquiry-based approach. It is also a popular international text being widely used in Australia. It is written by experts who understand both how to design good teaching material but also understand the exact assessment requirements of each specification. The Student's Book combines: - Clear explanation of specification content - Classroom-trialled activities that really motivate students - Extensive and intriguing source material and case studies It will enliven any history course and will help students achieve their best. This Teacher's Book supports the Student's Book with worksheets and teaching notes for all the main activities in the Student's Book.

The Legacy of Felix Klein Hans-Georg Weigand 2018-12-11 This open access

book provides an overview of Felix Klein's ideas, highlighting developments in university teaching and school mathematics related to Klein's thoughts, stemming from the last century. It discusses the meaning, importance and the legacy of Klein's ideas today and in the future, within an international, global context. Presenting extended versions of the talks at the Thematic Afternoon at ICME-13, the book shows that many of Klein's ideas can be reinterpreted in the context of the current situation, and offers tips and advice for dealing with current problems in teacher education and teaching mathematics in secondary schools. It proves that old ideas are timeless, but that it takes competent, committed and assertive individuals to bring these ideas to life. Throughout his professional life, Felix Klein emphasised the importance of reflecting upon mathematics teaching and learning from both a mathematical and a psychological or educational point of view. He also strongly promoted the modernisation of mathematics in the classroom, and developed ideas on university lectures for student teachers, which he later consolidated at the beginning of the last century in the three books on elementary mathematics from a higher standpoint. Comparative Sociology of Examinations
Fumiya Onaka 2019-03-28 Contemporary

societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.

Tourism and Hospitality Studies Irfan Yazicioglu 2020-12-16 This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as

gastronomy, recreation and marketing.

Things Fall Apart Chinua Achebe
2013-04-25 Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

Historical Outlook 1924

One Version of the Facts Henry E. Duckworth 2000-10-12 In his engaging memoirs, *One Version of the Facts: My Life in the Ivory Tower*, Dr. Henry Duckworth takes readers from his student days in Winnipeg and Chicago in the 1930s to his time as president of the University of Winnipeg (1971-1981) and chancellor of the University of Manitoba. An accomplished physicist, he wrote the first definitive text in English on mass spectroscopy, discovered the last stable isotope (platinum), and helped create important programs at universities and at the National Research Council. He also served on numerous councils for scientific and university organizations, and rubbed shoulders with Nobel Prize winners at international conferences. With humour and modesty, Henry Duckworth recalls trends, changes, and crises he witnessed throughout his long

university career. He offers his observations, his opinions, his "version of the facts," providing a special insight into critical years in Canada's university education history, as well as his own specialty, atomic research.

Acing Admissions Kavita Mehta, Kimberly Wright Dixit 2020-03-28
Acing Admissions is the only guide you need to help navigate the US undergraduate studies application process. Written with the international student in mind, *Acing Admissions* outlines frameworks for developing a college list, provides a step-by-step guide to submitting your application and describes the range of financial aid options available to international students. The book also gives detailed timelines with checkpoints for students who want to start planning as early as 8th grade. Practical advice is conveyed through anecdotes and case studies featuring real applicant stories, based on the authors' years of experience running an education consulting practice for students and families living outside the US.

The Intelligence 1898

How People Learn National Research Council 2000-08-11 First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about

the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Online Course Book Joanna Thomas

2015-05-22 Drive critical, engaged

learning. Helping learners more

deeply understand historical

concepts, the student-centred

approach of this new Course Book

enables broader, big picture

understanding. Developed directly

with the IB and fully supporting the

new 2015 syllabus, the structured

format helps you easily progress

through the new course content. -

Cover the new syllabus in the right

level of depth, with rich, thorough

subject content - Developed directly

the with IB, with the most

comprehensive support for the new

syllabus - Truly engage learners with

topical, relevant material that

convincingly connects learning with

the modern, global world - Streamline

your planning, with a clear and

thorough structure helping you

logically progress through the

syllabus - Decipher source

evaluation, refine and progress

analytical thinking and fully embed

vital Paper 1 skills, strengthening

exam performance - Integrate

Approaches to learning with ATLs like

thinking, communication, research and

social skills built directly into

learning - Help learners think

critically about improving

performance with extensive examiner

insight and samples based on the
