Improve Your Photography: How Budding Photographers Can Get Pro Results

Science and Skiing IV Erich Müller 2009 The book contains the proceedings of the Forth International Congress on Science and Skiing, which was held at St. Christoph am Arlberg, Tyrol, Austria. The conference was organized and hosted by the Department of Sport Science at the University of Salzburg, Austria, and by the Christian Doppler Laboratory "Biomechanics in Skiing," Salzburg, Austria. It was also part of the program of the steering group "Science in Skiing" of the World Commission of Sport Science. It contains a broad spectrum of current research work in Alpine and Nordic skiing and in snowboarding. In the proceedings of this congress, the keynotes are invited lectures as well as the oral presentations are publishes. The manuscripts were subject to peer review and editorial judgment prior to acceptance.

The Origin of Mind David C. Geary 2005-01-01 "Geary also explores a number of issues that are of interest in modern society, including how general intelligence relates to academic achievement, occupational status, and income."--BOOK JACKET.

The Race for Perfect: Inside the Quest to Design the Ultimate Portable Computer Steve Hamm 2008-10-31 Personal computing has reshaped economies and industries, and is transforming how we express ourselves and relate to one another. The most personal of personal computers are the portables. We carry these gadgets with us wherever we go, whether they're laptops, smartphones, or the coolest new Web-surfing devices. The Race for Perfect tells the story of two generations of entrepreneurs, designers, and engineers as they have struggled to make ever-better portables. Steve Hamm takes the reader into a world where inspiration, design, engineering, and marketing come together to produce wave upon wave of the innovative products that we love to talk about and use. From the earliest days of portable computing, 40 years ago, entrepreneurs and designers have pushed forward relentlessly in a quest to create the perfect device. Their efforts have produced a few fabulous successes and many failures. But they never give up. They're driven by the basic rule of the tech industry: innovate or die. In addition to a fascinating read, The Race for Perfect offers valuable lessons for business people in any industry, revealing how they must INNOVATE constantly to differentiate their products CREATE design principles that are timeless INTEGRATE design and engineering so products are both useful and fun to use IMPROVE quality and convenience without compromise TAP social networks to turn customers into fans At the center of this tale is the story of a single product, Lenovo's ThinkPad X300 laptop. Lenovo, the first Chinese company to seek to establish a global consumer brand, bought IBM's PC division in 2005 primarily to get the company's storied ThinkPad laptops. The X300 was conceived as a "halo" product that would draw customers to Lenovo's entire line. Woven through The Race for Perfect is a case study of how this ambitious company, with teams in Japan, the United States, and China, marshaled its resources to pursue laptop perfection. As X300 came close to the finish line, it collided head-on with Apple's super-slim MacBook Air—with surprising results.

How People Tick Mike Leibling 2009-04-03 This new edition of How People Tick is a practical guide to over 50 types of difficult people such as Angry People, Blamers, Impatient People, Workaholics and Gossips. Each difficult situation is described, how it happens is analysed, and then strategies to help you deal with the problem are suggested. Disruptive behaviour patterns can be addressed once and for all, instead of having to handle one-off 'difficult' events, time and time again. Absolutely invaluable to everybody, How People Tick is full of tried and tested tips for handling 'difficult' people in 'difficult' situations, based on a real understanding of their behaviour. It is an essential read if you find people bewildering or just plain difficult, and yet still want to understand them, work with them and live with them.

Proceedings of the 8th International Ergonomics Conference Davor Sumpor 2021-03-29 This book presents the proceedings of the 8th International Ergonomics Conference (ERGONOMICS), held in Zagreb, Croatia on December 2-5, 2020. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors.

CompTIA® Linux+? Powered by LPI (Exams LX0-103 and LX0-104) Logical Operations 2015-06-08

Super Charge Power BI Matt Allington 2018-06-01 Power BI is a powerful self-service (and enterprise) business intelligence (BI) tool that was first made generally available by Microsoft in July 2015.

Power BI is a complete BI package that covers the end to end BI process including data acquisition (get data), data modelling (prepare/model the data) and data visualisation (analyse the data). And there is a lot of good news about this tool including the fact that the skills needed to succeed with Power BI are fully transferable to Microsoft Excel. There are 3 learning areas required to master everything Power BI Desktop has to offer.1. The M Language - used for data acquisition2. The DAX Language - used to prepare and model data3. Visualisation and analysis - used to present data in a compelling wayPower BI is probably the first commercial grade software product that brings all of these areas into a single software package that is completely accessible to a business user (you don't need to be an IT pro). This book focuses on number 2 above, the DAX language (Data Analysis Expressions). Super Charge Power BI Desktop is the second book written by Matt Allington and is a sister book to his first book Learn to Write DAX (first released Dec 2015). Super Charge Power BI Desktop uses the same learning and practice exercise framework as used in Learn to Write DAX however the entire book is written using the Power BI Desktop user interface. Unfortunately simply reading a book is normally not enough for Excel users wanting to get the most out of Power BI Desktop and to learn the DAX language - most people will also need some practice. Super Charge Power BI Desktop is different to other books - it is written in such a way to clearly explain the concepts of Power BI data modelling while at the same time giving hands-on practice to deeply engage the reader to help the new knowledge and concepts stick. The book first presents the theory, then provides worked through sample exercises demonstrating each of the concepts, and finally it provides the reader with practice exercises and answers to maximize learning retention.

Working Memory Pierre Barrouillet 2014-09-19 Working memory is the cognitive system in charge of the temporary maintenance of information in view of its on-going processing. Lying at the centre of cognition, it has become a key concept in psychological science. The book presents a critical review and synthesis of the working memory literature, and also presents an innovative new theory - the Time-Based Resource-Sharing (TBRS) model. Tracing back the evolution of the concept of working memory, from its introduction by Baddeley and Hitch in 1974 and the development of their modal model, Barrouillet and Camos explain how an alternative conception could have been developed from the very beginning, and why it is needed today. This alternative model takes into account the temporal dynamics of mental functioning. The book describes a new architecture for working memory, and provides a description of its functioning, its development, the sources of individual differences, and hints about neural substrates. The authors address central and debated questions about working memory, and also more general issues about cognitive architecture and functioning. Working Memory: Loss and Reconstruction will be essential reading for advanced students and researchers of the psychology of memory.

Mighty Tiny Ben Dunn 2005-09-28 In the age of discovery. Two countries are on the brink of war. An underground organization plans to create the spark that will ignite war. Two friends uncover the conspiracy. Welcome to the world of Mighty Tiny. The two mightiest empires Mosputa and Ratveria, have an uneasy truce, on the verge of a truly lasting peace. But a group known as the Triad plans to bring the two countries back into a devastating war that will leave themselves as the masters.

Mac OS X David Pogue 2002 Demonstrates the operating system's basic features, including Internet access, file management, configuring the desktop, installing peripherals, and working with applications.

Control of Cognitive Processes International Symposium on Attention and Performance 2000 The thirty-two contributions discuss evidence from psychological experiments with healthy and brain-damaged subjects, functional imaging, electrophysiology, and computational modeling.

A Consumers' Republic Lizabeth Cohen 2004 An illuminating social and political history describes how mass consumption and the pursuit of prosperity transformed American life during the second half of the twentieth century, detailing the rise of political activism through the civil rights and consumer movements, the suburbanization of metropolitan areas, the changing relationship of Americans with

government, and more. Reprint. 15,000 first printing.

Marketing Public Relations Gaetan T. Giannini 2009-07-01 For undergraduate public relations, new media, and marketing courses. The first text to teach public relations through the lens of marketing.

Marketing Public Relations breaks from the norm by presenting public relations using a marketing, rather than a communications studies or journalism, approach. This text recognizes the similarities between PR, word-of-mouth, and social networking media and creates a framework for constructing marketing strategies that incorporate these highly credible and cost-effective tools. Students will first learn the theory and then how to apply it in order to "do Marketing Public Relations" in the real world

Tiny But Tuff : a Collection of Poetry Dudzic, Halina Anna 1993

You Are #1 Holly Blair 2022-03-20 You remember your favorite teacher, don't you? How about your least favorite teacher? Some were good... Some were not so good... Some were REALLY good... And, some were just plain AWFUL! Teachers have remarkable impacts on everyone. YOUR students deserve to have the best teacher in front of them at all times. In You Are #1, stories and science merge in order to create an understanding about how the power of a teacher stays with everyone for the rest of their lives. See why YOU remember those individuals from YOUR days in school and learn how YOU can become the #1 best teacher and role model for each and every one of your students who learns from YOU every single day. In YOU ARE #1, Blair and Jetter outline research-based characteristics and brain research to explain how teachers SHOULD be and how they WOULD WANT to be in order to improve education EVERYWHERE for all eternity!

A Family Affair: Inspirational Short Stories & Poetry about Family & Faith Yanatha Desouvre

Perception in Multimodal Dialogue Systems Elisabeth Andre 2008-06-11 The IEEE Tutorialand ResearchWorkshopon Perceptionand InteractiveTe- nologies for Multimodal Dialogue Systems (PIT 2008) is the continuation of a successful series of workshops that started with an ISCA Tutorial and Research WorkshoponMultimodalDialogueSystemsin1999.Thisworkshopwasfollowed by a second one focusing on mobile dialogue systems (IDS 2002), a third one exploring the role of a?ect in dialogue (ADS 2004), and a fourth one focusing on perceptive interfaces (PIT 2006). Like its predecessors, PIT 2008 took place at Kloster Irsee in Bavaria. Due to the increasing interest in perceptive interfaces, we decided to hold a follow-up workshop on the themes discussed at PIT 2006, but encouraged aboveallpaperswithafocusonperceptioninmultimodaldialoguesystems.PIT 2008received37 paperscoveringthe following topics (1) multimodal and spoken dialogue systems, (2) classi?cation of dialogue acts and sound, (3) recognitionof eye gaze, head poses, mimics and speech aswellascombinationsofmodalities, (4) vocal emotion recognition, (5) human-like and social dialogue systems and (6) evaluation methods for multimodal dialogue systems. Noteworthy was the strong participation from industry at PIT 2008. Indeed, 17 of the accepted 37 papers come from industrial organizations or were written in collaboration with them. Wewouldliketothankallauthorsforthe e?ortthey madewiththeirsubm- sions, and the Program Committee - nearly 50 distinguished researchers from industry and academia - who worked very hard to meet tight deadlines and selected the best contributions for the ?nal program. Special thanks goes to our invited speaker, Anton Batliner from Friedrich-Alexander-Universit? atErlangen- N? urnberg.

Reading and Taking Notes OPen University 2007-06-25 Knowing how to read effectively and when to take appropriate notes can help you make swift progress during your course. This booklet contains advice and tips to help you improve your assignments. There is an accompanying Skills for OU Study website http://www.open.ac.uk/skillsforstudy.If you are a current OU student please contact Student Services before ordering.

Mastering Windows 7 Deployment Aidan Finn 2011-03-10 Get professional-level instruction on Windows 7 deployment tools Enterprise-level operating system deployment is challenging and requires knowledge of specific tools. It is expected that Windows 7 will be extensively deployed in businesses worldwide. This comprehensive Sybex guide provides thorough coverage of the Microsoft deployment tools that were specifically created for Windows 7, preparing system administrators, MIS professionals, and corporate programmers to tackle the task effectively. Companies worldwide are expected to deploy Windows 7 as their enterprise operating system; system administrators and IT professionals need comprehensive instruction on Microsoft's deployment tools This complete guide provides clear, step-by-step instruction on planning, installing, configuring, deploying, and troubleshooting deployment methods for each tool Covers the Microsoft Assessment and Planning (MAP) Toolkit, Application Compatibility Toolkit (ACT), Windows PE, Windows Automated Installation Kit (WAIK), Windows System Image Manager (WSIM), Easy Transfer, User State Migration Toolkit (USMT), Windows Deployment Services, Microsoft Deployment Toolkit 2010, System Center Configuration Manager, Key Management Service, and Volume Activation Management Tool (VAMT) Illustrated with plenty of real-world scenarios, Mastering Windows Deployment provides the hands-on instruction you need to fully understand and use each deployment technology.

The Psychology of Religion Vassilis Saroglou 2020-10-07 Does religion positively affect well-being? What leads to fundamentalism? Do religious beliefs make us more moral? The Psychology of Religion explores the often contradictory ideas people have about religion and religious faiths, spirituality, fundamentalism, and atheism. The book examines whether we choose to be religious, or whether it is down to factors such as genes, environment, personality, cognition, and emotion. It analyses religion's effects on morality, health, and social behavior and asks whether religion will survive in our modern society. Offering a balanced view, The Psychology of Religion shows that both religiosity and atheism have their own psychological costs and benefits, with some of them becoming more salient in certain environments.

Creativity Robert W. Weisberg 2016-05-12

A Guide to the Top 100 Companies in China Wenxian Zhang 2010 Under the label of "the socialist market economy with Chinese characteristics," the Chinese Government has made a firm commitment to economic reform, though still retaining tight political control. Thus, under conditions of liberal economic systems and autocratic rule, a new capitalist system is emerging in China; its top companies are managed by private entrepreneurs, government bodies or a combination of both. This book, presented in an easily accessible format, fills an important gap in the growing literature on China in the global economy and provides a research reference tool on China's top companies. It contains a comprehensive directory listing of the Top 100 corporations in China, thus enhancing the research potential on China for students, researchers and businesses is alike. As a general reference guide to the Chinese economy, A Guide to the Top 100 Companies in China provides up-to-date and comprehensive coverage of the top Chinese enterprises. Corporations from Hong Kong and Taiwan that conduct significant business in China are also included.

The Urban Generation Zhen Zhang 2007-03-28 DIVAn anthology that explores film works by the "urban generation,"--filmmakers who operate outside of "mainstream" (officially sanctioned) Chinese cinema -- whose impact has been enormous./div

Empirical Comics Research Alexander Dunst 2020-08-14 This edited volume brings together work in the field of empirical comics research. Drawing on computer and cognitive science, psychology and art history, linguistics and literary studies, each chapter presents innovative methods and establishes the practical and theoretical motivations for the quantitative study of comics, manga, and graphic novels. Individual chapters focus on corpus studies, the potential of crowdsourcing for comics research, annotation and narrative analysis, cognitive processing and reception studies. This volume opens up new perspectives for the study of visual narrative, making it a key reference for anyone interested in the scientific study of art and literature as well as the digital humanities.

Max Hits Mike Slocombe 2003-01 With the emphasis firmly on creativity and individualism, Max Hits aims to encourage readers to be experimental and bold in order to produce original and compelling sites that will keep visitors coming back for more. Debunking the many myths and obstacles surrounding web design. Max Hits proves that you don't need big budgets or the latest technology to produce a successful site. Readers can discover how to benefit from research and planning, and learn the practical processes of design, navigation and content management. Key issues such as accessibility, usability and information architecture are discussed and analysed with case studies and examples. Successful web sites aren't just built: they have to be actively promoted and marketed. Max Hits shows you how to construct and deliver an effective on-line marketing strategy, how to provide 'sticky' content and, crucially, how to bump your site up the search engine rankings.

Office Ergonomics Safety Guide 1996

The Lenovo Way: Managing a Diverse Global Company for Optimal Performance Gina Qiao 2014-08-15 The Lenovo Way to Profitability and Growth In 2005, the Chinese corporation Lenovo acquired what was seen as a sacred American icon--IBM's personal computer business. It has since grown to become the world's biggest PC company and is now rapidly growing in the global mobile space. The Lenovo Way reveals practical methods for managing a truly diverse workforce operating around the world, drawn from both China and the United States. Gina Qiao is Senior Vice President of HR at Lenovo. Yolanda Conyers is Vice President of HR Operations and Chief Diversity Officer at Lenovo.
