Business Strategy The Economist 2015-05-26 The effectiveness of a good strategy well implemented determines a business' future success or failure. Yet history is full of strategic decisions, big and small, that were ill-conceived, poorly organized and consequently disastrous. This updated guide looks at the whole process of strategic decision-making, from vision, forecasting, and resource allocation, through to implementation and innovation. Strategy is about understanding where you are now, where you are heading and how you will get there. There is no room for timidity or confusion. Although the CEO and the board decide a company's overall direction, it is the managers at all levels of the organization who will determine how the vision can be transformed into action. In short, everyone is involved in strategy. But getting it right involves difficult choices: which customers to target, what products to offer, and the best way to keep costs low and service high. And constantly changing business conditions inevitably bring risks. Even after business strategy has been developed, a company must remain nimble and alert to change, and view strategy as an ongoing and evolving process. The message of this guide is simple: strategy matters, and getting it right is fundamental to business success.

Birth Unhindered Tara L. McGuire 2010-08-16 About this book No more powerful transformation is available to a woman than that of the unhindered birth of

her child. As a woman's body opens to the life of her baby, so too is she opened to the rawness and beauty of woman-hood. At the culmination of an unhindered pregnancy and birth, a woman is left with an increased sense of strength and confidence as a woman and a mother. This often fearful and dreaded event of childbirth is largely misunderstood and shrouded in mystery. The harmful routines and common procedures performed during pregnancy, labor and birth more often than not strip the mother of her ability and right to birth spontaneously and with the joy and love possible. By lessening fear and increasing awareness, a woman is able to come through her journey of natural childbirth as a new and stronger woman and mother. The book Birth Unhindered will help increase confidence, peace and acceptance of this transformative time in life as well as allow the reader to participate in the journeys of other women just like her. Tara McGuire is a speaker and author on the topics of pregnancy, birth, personal growth and empowerment. She has a history as a Certified Childbirth Educator and CCE Trainer through Birth Works(c) Inc., as well as acting as a birth attendant. Currently, Tara co-owns and operates Epidavros Center for Wellbeing and Epidavros Yoga Studio with her husband, Don. In addition to these activities, Tara is a home-schooling mother of four children and surrogate mother to one.

Shelters, Shacks and Shanties Daniel Carter Beard 2015-09-11 ËIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesÑthat is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.
