**Strategic Intent** Gary Hamel 2010 In this McKinsey Award-winning article, first published in May 1989, Gary

Hamel and C.K. Prahalad explain that Western companies have wasted too much time and energy replicating the cost and quality advantages their global competitors already experience. Canon and other world-class competitors have taken a different approach to strategy: one of strategic intent. They begin with a goal that exceeds the company's present grasp and existing resources: "Beat Xerox"; "encircle Caterpillar." Then they rally the organization to close the gap by setting challenges that focus employees' efforts in the near to medium term: "Build a personal copier to sell for \$1,000"; "cut product development time by 75%." Year after year, they emphasize competitive innovation--building a portfolio of competitive advantages; searching markets for "loose bricks" that rivals have left underdefended; changing the terms of competitive engagement to avoid playing by the leader's rules. The result is a global leadership position and an approach to competition that has reduced larger, stronger Western rivals to playing an endless game of catch-up.

Consumer Behaviour Isabelle Szmigin 2014-11-01 Presenting a brand new approach to teaching consumer behaviour, Szmigin and Piacentini move beyond traditional psychological learning to acknowledge more holistic perspectives of consumer behaviour and incorporate new areas of research, such as Consumer Culture Theory, which are enhancing our understanding of this fascinating subject. The latest behavioural, psychological and sociological approaches are presented alongside emerging techniques, such as neuromarketing, with their application to marketing explicitly drawn out. Theory is firmly set in context for students through extensive use of international examples and extended cases on topics such as repertoire shopping in China, lifestyles of Indian consumers, and learning about brands through Havaianas in Brazil. Each chapter includes Consumer Insights covering topics such as social media marketing in the Netherlands, repositioning Lucozade in the UK, and finding the right celebrity endorser. These features bring together the themes discussed and encourage students to engage with the material on a more practical level. Central to the book is the recognition of how businesses and government are likely to use knowledge of these theories and techniques in marketing strategies and business decision making. Each chapter includes a Practitioner Insight from a professional working in marketing, advertising, government or charity, including Dubit, Thinkbox and Age UK to provide real world views on the topics being discussed and the possible future direction of these areas. The authors acknowledge consumer behaviour as a research discipline.
